Personal Statement

Second year Computer Science student at the University of Portsmouth. I have experience with designing and developing modern websites within my University projects and work experience. I'm looking for a web development placement where I can apply and broaden my development skills and knowledge.

Education

University of Portsmouth, 2016—Present

BSc Computer Science, first year average - **85%**

- Introduction to Programming - **100%**
- Computer Architecture - **87%**
- Web Foundations - **85%**
- Network Fundamentals - **81%**
- Database Design and Development - **74%**

John Colet School, 2009—2016

A Levels incl, Communication and Culture (**B**), and Double Award (Equivalent to two A-levels) Applied ICT (**BC**) .

GCSE 12 Grade B-D including English and Maths.

Work Experience

Interiors of Aylesbury—Freelance Website Design and Development, 2017—Present

- Creation of website designs
- Development of functional prototypes
- Custom WordPress theme development
- Content creation and maintenance

Personal Projects

- Developed single-page web app for viewing multiple livestreams from video game live streaming website Twitch.tv.
- Developed informational website that teaches the basics of the Korean language.

Skills

Technical

- HTML5, CSS3
- JavaScript
- AngularJS/React
- Git version control
- Adobe Photoshop
- Adobe Experience Design
- Python
- Java

Transferable

- Self-motivated, demonstrated by the creation of multiple of personal projects.
- Excellent time and project management, as evidenced in the successful production and meeting of deadlines within the Interiors of Aylesbury website.
- Outstanding leadership and teamwork skills, as indicated by the strong marks in my team based University projects.

Hobbies and Interests

Passionate interest in designing and producing personal web-development projects. I'm active on the front-end development website Codepen where I share my own code, and assist others members with improving their own code.

I enjoy 3D modelling and animation and am active on the 3D modelling community Sketchfab.

I'm currently at the beginner level with the Korean language, and to support my own and others learning I produce informative websites and materials .
